Portfolio: anushka2478.github.io/Portfolio | LinkedIn: linkedin.com/in/anushka-srivastava-010a69297

Professional Summary

User interface designer/User Experience Designer with 3+ years of experience designing dashboard-heavy SaaS products, HRMS tools, mobile apps and websites. Currently Deputy Team Lead – UX Engineering at HABOT CONNECT, leading UI/UX for the HRMS Portal and internal workflow tools. Builds scalable design systems in Figma and collaborates closely with developers to turn them into production-ready components. Delivered designs 30% faster by introducing AI-assisted tools (Figma AI, Gemini, ChatGPT) into the team's design process. Combines user research, information architecture and interaction design with strong analytical thinking from a commerce, accounts and mathematics background.

Core Skills

UX Research & Strategy: User Research, Persona Development, Jobs-to-be-Done (JTBD), User Journey Mapping, Competitive Analysis, Information Architecture (IA), User Flows, Usability Test Planning, Success Metrics

UI & Interaction Design: Wireframing, Prototyping, Visual Design, Interaction Design, Micro-interactions, Responsive Design, Dark Mode, Accessibility (WCAG Colour Contrast)

Design Systems: Design Systems, Design Tokens, Component Libraries, Figma Variables, Developer Handoff, Design-to-Code Collaboration

Professional: Leadership, Team Management, Project Management, Problem-Solving, Analytical Thinking, Communication, Cross-functional Collaboration, Time Management, Strategy, Execution, Process Improvement, Workflow Automation

Tools: Figma, Figma AI, Framer, WordPress, Gemini, ChatGPT, GitHub

Domains: SaaS, HRMS / HR Tech, Fintech, Healthtech, EdTech, AI Workflow Tools, B2B Web Apps, Mobile Apps (iOS & Android)

Professional Experience

Deputy Team Lead – UX Engineering | HABOT CONNECT | 2025 – Present

- Lead UI/UX design for the HRMS Portal and internal workflow tools, from requirements and user research to wireframes, high-fidelity UI and developer handoff.

- Redesigned internal workflows to replace manual steps with automated ones, optimising day-to-day processes for HR and operations users.
- Implemented AI-assisted design tools (Figma AI, Gemini, ChatGPT) in the team's design process and documented the workflow, delivering designs 30% faster.
- Design and maintain Figma design systems, collaborating with developers to ship them as reusable, consistent UI components.
- Plan and review the team's design work, manage timelines and communicate design decisions to stakeholders.

Subtrack Owner & Team Manager | 2024 – 2025

- Owned a product sub-track end to end and managed its team, setting priorities, planning work and tracking execution against deadlines.
- Coordinated across design and development to deliver features on time and improve team processes.

Freelance UI/UX Designer | Self-employed | 2022 – 2024

- Designed websites, mobile apps and dashboard interfaces for clients, from discovery and wireframes to final UI.
- Built and launched client websites using Framer and WordPress.
- Managed client communication, project scope and delivery timelines independently.

UI/UX Design Intern | Two internships

- Supported user research, wireframing and UI design work alongside senior designers.

Selected Projects

Concept case studies with full process (problem, research, IA, wireframes, final UI, prototype and metrics) at anushka2478.github.io/Portfolio

Relay – AI Workflow Platform (B2B Web App) | 2022

- Designed a B2B web app where operations teams build, run and supervise AI agent workflows, with a visual canvas, step-by-step run traces and human approval gates.
- Delivered 29 screens and a landing page in dark and light themes, including 19 edge and error states (SSO error, publish blocked, approval expired and more).
- Extracted 24 components and added 8 new ones (dialog, toast, banner, tooltip, menu) into a documented design system with a usage index.
- Defined success targets such as under 10 minutes to the first successful test run and 70% of failed runs diagnosed without engineering.

Kosh – Personal Finance App (Fintech, iOS & Android) | 2022

- Designed a mobile money app that links bank accounts through India's RBI Account Aggregator

framework, explains spending and turns insights into budgets, goals, SIPs and UPI payments.
- Delivered 28 core screens with states and dark mode, focused on trust and consent flows.
- Defined success targets including 75% Account Aggregator consent completion and an 80+ SUS usability score.

Pulsewise – Health Monitoring App and Clinician Console (Healthtech) | 2023

- Designed a patient app and clinician console across 27 screens, with large-text and dark modes for older users.
- Defined success targets: 95% of critical alerts acknowledged within 30 minutes and under 90 seconds per clinician patient review.

Education

Bachelor of Commerce (B.Com), Accounts & Mathematics | University of Lucknow, Lucknow

Class XII | City Montessori School, Lucknow
